
2.0 Methodology	12
2.1 Sample Collection and Preparation	12
2.2 Ash Content Determination	13
2.3 Moisture Content Analysis	14
2.4 Mineral Content Analysis via Atomic Emission Spectroscopy (AES)	15
2.5 Total Antioxidant Capacity (TAC) via DPPH Assay	17
2.6 Statistical Analysis	18
3.0 Results	21
3.1 Ash Content Analysis of Organic and Non-Organic Bananas	21
3.2 Moisture Content Analysis of Organic and Non-Organic Bananas	22
3.3 AES Results for Sodium, Calcium, and Magnesium in Organic and Non-Organic Banana Samples	23
3.4 DPPH Free Radical Scavenging Activity via Spectrophotometer	29
4.0 Discussion	31
4.1 Mineral Composition	31
4.2 Recommendations	34
5.0 Conclusion	36
References	37
Appendix	41
